

# Communications

## Unified Communications System Deployment & Scaling

### The Challenge: Mass Scale and Consistency

Deploying UC hardware (VoIP, video, network endpoints) across thousands of locations requires speed and precision. Inconsistent configurations and network errors lead to lost productivity. Vault CPS provides the agile logistics and automation needed for flawless deployment.

### Our Solution: Automated Staging and Custom Provisioning

We act as an extension of your operations team, automating repetitive tasks. We ensure every device is perfectly configured to its specific network requirements before it arrives.

# Payments

## Secure Payments Lifecycle Management

### The Challenge: Security, Speed, and Compliance

Payment terminals must be 100% secure and PCI-compliant. The complexity of key injection and cryptographic security creates massive risk. Vault CPS minimizes that risk.

### Our Solution: Secure Key Injection and Deployment Readiness

We provide end-to-end management for payment hardware in certified environments. We ensure every device is serialized and cryptographically secure before it leaves our facility.

# Repair & Refurbishment

## Asset Recovery, Repair, & the Circular Economy

### The Challenge: Maximizing ROI and Sustainability

Replacing high-value hardware is costly and unsustainable. You need a partner who can repair devices while guaranteeing data security. Vault CPS delivers lifecycle management that cuts CAPEX and supports ESG goals.

### Our Solution: Certified Component-Level Repair & Refurbishment

We specialize in Level 3 component repair, extending asset life beyond the warranty. Every step—from receiving to sanitization—is handled in certified environments.

## Key Services

### Automated Provisioning

User settings and firmware updated on-site.

Value to You: Eliminate Errors; Fast Rollouts.

### Custom Labeling

Asset tags and unique identifiers (MAC/Phone) applied.

Value to You: Simplified Inventory Audits.

### Certified KIF

PCI-compliant facilities for cryptographic key loading.

Value to You: Guaranteed Compliance & Readiness.

### Secure Image Loading

Pre-loading OS and apps for plug-and-play use.

Value to You: Rapid Deployment; Reduced Costs.

### Component Repair (L3)

Intricate diagnostics and repair of individual components.

Value to You: Maximize ROI; Lower Replacement Costs.

### Certified Data Erasure

Auditable sanitization meeting industry standards.

Value to You: Guaranteed Security & Compliance.

### Kit Assembly

Combining devices, cables, and guides into site-ready kits.

Value to You: 50% Less Installation Time.

### JIT Logistics

Site-direct delivery exactly when needed.

Value to You: Lower Storage & Handling Costs.

### Advanced Asset Tracking

Serial-level tracking from injection to end-of-life.

Value to You: Total Asset Visibility.

### Secure Logistics

Coordinated shipping protecting chain-of-custody.

Value to You: Minimized Transit Risk.

### Reverse Logistics

Efficient management of defective or retired assets.

Value to You: Streamlined Returns & Inventory.

### Circular Economy Reporting

Metrics on saved devices and cost avoidance.

Value to You: Supports ESG Mandates.

## Why Vault CPS for Communications?

We enable you to scale faster. Our process automation meets aggressive schedules while ensuring consistent quality across every endpoint.

## Why Vault CPS for Payments?

We don't just move boxes; we manage cryptographic security at scale. With 25+ years of experience, we ensure your high-value assets perform reliably from Day One.

## Why Vault CPS for Repair?

We focus on extending technology life. Our component-level approach provides significant savings, operational continuity, and a sustainable future for your IT assets.
